

CODE CONSISTENCY MEETING  
APRIL 24, 2008

Our Code Consistency committee members met to brainstorm on goals we'd like to accomplish in 2008.

Our mission statement is as follows: To promote communication and consistency to better serve the community and streamline the process by becoming more informative for public safety and understanding in a user friendly environment.

By our quarterly meeting on October 16, 2008 we plan to have a packet put together consisting of all forms and applications used by the different jurisdictions.

We are researching information on how we can be involved in any FEMA disaster plan.

Have a member (rotate) from our group attend the monthly COCOA meetings.
